EXPERIENCE

Vicor Corporation – UX/UI Marketing Co-op – Andover, MA

July – December 2025

- Designed and updated web pages within Jahia CMS using company style guides to improve consistency, layout, and responsiveness across Vicor's digital platforms
- Created Figma prototypes and visual assets to enhance user navigation and support marketing campaigns across multiple product lines
- Collaborated with cross-functional teams on UX research, design iterations, and web content optimization to strengthen customer engagement and brand alignment

Khoury College of Computer Sciences – Teaching Assistant – Boston, MA

January 2026 – May 2026

- Conduct resume reviews and mock interviews for CS1210 students, providing targeted feedback to improve technical and professional co-op readiness
- Assist with course facilitation and class structure, reinforcing professional communication, career readiness skills, and best practices for navigating the co-op application process

Ghanaian Student Organization – President – May 2026 | Marketing Chair – 2023 -2024

- Leading organizational initiatives to promote Ghanaian culture, increase member engagement, and foster an inclusive campus community
- Coordinating 2-5 events and cross-organization collaborations per semester, driving participation and building a vibrant cultural network

Northeastern College of Professional Studies – Web Content Specialist – Boston, MA

January – May 2025

- Optimized website content to support marketing initiatives, ensuring consistency with branding guidelines and goals
- Collaborated with the marketing and communications team to create engaging digital assets, including written content, multimedia integration, and interactive features

PROJECTS – <https://bellaboateng.github.io/portfolio/>

Mini Spotify – Frontend Developer

February 2026 – March 2026

- Built a Spotify-inspired web interface using **HTML, CSS, and JavaScript**, focusing on layout, responsiveness, and interaction design
- Implemented dynamic **UI components** and user interactions to simulate a music browsing experience
- Applied visual hierarchy and styling techniques to create a cohesive and engaging user interface

Student Performance Visualization – Data Visualization Project

January 2026 – April 2026

- Built visualizations using tools such as **Altair and D3.js**, incorporating filters and interactive elements to explore relationships between variables
- Collaborated in a team to clean data, structure insights, and present findings through clear visual storytelling
- Applied principles of **data visualization and user interaction** to communicate complex patterns effectively

Amour Skin – Brand & Digital Experience

January 2024 – December 2025

- Developed digital brand experiences across web and social platforms, designing **user flows** and content structures to improve product discovery and launch visibility
- Collaborated on **product storytelling and collection rollouts**, including Amour Skin Men

BTL Ashmi Health – Graphic Designer

January – March 2025

- Designed a cohesive **visual identity** for Ashmi Health's rebrand, including logo refinements, typography, and color palette aligned with **AI-driven healthcare positioning**
- Collaborated with the **web developer and strategist** to deliver a brand vision for the Beyond the Logo challenge

General Interest: Cooking and Baking | Music | Fitness | Faith | Language Proficiency (English and Twi)
